

Overnight Hackathon

Date: 10th Jan 2025 - 11th Jan 2025

Venue: CS Labs

Hey there, Hackers! 🌙

Buckle up for an epic night of coding, creativity, and caffeine-fueled innovation! Whether you're here to create the next big thing or just to have some fun and push your limits, we're stoked to have you join us for this all-night hacking marathon.

Tonight, it's all about bringing your wildest ideas to life and turning them into something incredible – in just a few hours. Expect a lot of brainstorming, sleepless coding, teamwork, and of course, a dash of friendly competition. 💻🚀

To make sure everyone has a smooth and productive experience, we've put together a few ground rules and instructions for the event. Trust us, they're quick and easy to follow, so you can get straight to hacking.

The Timeline

11:30

PS Announced and
Coding Phase
begins!

1:30

Caffeine Supply

6:00

Coding Phase Over
Demos Begin!

7:30

End of Event

- **Timings:** 11PM (10th Jan) to 8AM (11th Jan)
- **Venue:** CS Labs

Venue Rules

Respect the Lab Space

You're free to use the lab computers or your own laptops. If you're using lab computers, please ensure everything is returned to its original state by the end of the hackathon. No software or settings should be changed permanently on lab computers. And if you are removing and using any cables from the lab PCs (ethernet or HDMI), make sure you insert them back before leaving.

Keep It Clean

We know coffee fuels creativity! ☕ But please make sure to dispose of cups and other trash in the bins provided. Keep your workspace neat and tidy throughout the event, and leave it spotless when you're done. **No littering** in the lab area. We've got caffeine, not chaos!

Respect the Equipment

Treat all lab equipment with care. Any damages or missing equipment will be your responsibility, so let's be gentle with those machines!

Keep Noise in Check

We get it, you're pumped! But please be mindful of noise levels, especially late into the night. Let's keep the space focused and collaborative.

Food & Drinks

Food and drinks (especially coffee!) are allowed, but keep them away from keyboards and equipment. We don't want any liquid disasters!

Power & Internet

Use the power sockets and internet responsibly. Everyone's working hard, so avoid overloading circuits or hogging bandwidth.

Competition Rules

Originality is Key

Feel free to draw inspiration from online resources, but **entirely copying a project from the web** is not allowed. We want to see **your** ideas, creativity, and effort come to life! If you're building on existing frameworks or libraries (totally cool!), make sure to give credit where it's due.

Team Size

Each team can have a **maximum of 5 members**. Collaboration is encouraged—five minds are better than one!

Time Limit

You'll have the entire night to build your project. The hackathon starts at **11:30 PM** and ends at **6:00 AM**. Be sure to submit your projects on time—no late submissions will be accepted!

Tech Stack

You're free to use any programming languages, libraries, frameworks, or tools you prefer. Whether it's web, mobile, desktop, or something else entirely, the choice is yours!

Project Submission

All projects must be submitted by the end of the hackathon at **6:00 AM**. Be sure to include your code, documentation, and a brief description of your project. A Demo round will be conducted at the end of the hacking phase, where all teams will be presenting their products as well.

Judging Criteria

Projects will be judged on **creativity, innovation, functionality, and presentation**. Bonus points for adding functionality not suggested by the organizing team. Those unique twists are always welcome, and who knows they are the points that boost you to the top 🚀

Help & Collaboration

Mentors can help out and provide you hints towards the correct direction, but you're expected to come up with solutions by yourself. No interaction between different teams is allowed, no matter if they are from the same hall.

Have Fun!

This is a friendly competition, so don't stress too much—learn, collaborate, and have a great time building something awesome! 🎉
